Download

Here you can download AusweisApp.

Download AusweisApp

AusweisApp is a software that you install on your smartphone, computer or tablet in order to read out your ID card and to be able to identify yourself digitally. In addition, AusweisApp enables encrypted data exchange between the ID card and the online service where you want to identify yourself.

Depending on your operating system, select the appropriate download and install AusweisApp on your computer, smartphone or tablet.

Supported systems: Android 9.0 or higher, iOS 14.0 or higher, macOS 12.0 or higher, Windows 10 (64 Bit) and 11, Windows Server 2016 (Version 1607), 2019, 2022.

Note: New name, new look - the AusweisApp becomes the AusweisApp! As part of the rebranding of the AusweisApp, the 2 in the name has gone, but there is a fresh, new design on top. What you can still rely on: You can still use the ID card app to securely identify yourself online.

What AusweisApp Offers

Welcome Page

The welcome page takes you to functions such as PIN management, the provider list, and the option of displaying the data stored on your ID card. In the mobile app, you can also check whether your device can read out the eID card and whether the eID function of your ID card is activated.

Permissions Request

Before each readout of your ID card data, AusweisApp2 displays the so-called authorization certificate of service provider. This provides information about your data is to be transmitted to and what data the provider wants to read from your ID card.

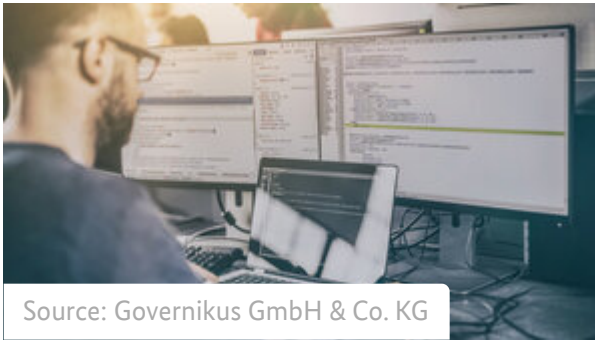

The authorization certificate is a government permit. The service provider must apply for it at the Federal Office of Administration. With the application, he commits himself to comply with all legal requirements regarding data protection and IT security. The validity of this certificate is checked and displayed for each new
